

Prescribed Burns Study Newsletter

Thank you to all 6 families who were so kind in facilitating us with this study, including your little scientists who have been such an amazing support! In total, we had 18 participants, which was a lot more than we anticipated! Without your support, our first data collection would not have been successful.

NEXT PLANNED BURNS

It is unlikely there will be anymore planned burns this year due to wet weather, but we are optimistic about conducting more data collection when it commences next year!

We are actively recruiting participants to join our study, so if you know any interested neighbours, friends and families living close to a forest reserve, please have them contact Dr

Dwan Vilcins at d.vilcins@uq.edu.au or register in this link
